

I am commenting relating to the Low Power FM stations taking priority over translators. I am from Wyoming and we don't have many Christian radio stations. The only ones I can listen to are the KLOVE translator and the AirOne translator, 90.9 and 88.9. Because the FCC is supposed to be in the public interest, I believe it is in the public interest to have the opportunity to listen to different types of music, not just commercial music. Therefore, please allow the translators to stay in our area.

Sincerely

Cindy Price
